

Microsoft Teams Phone

Microsoft Teams Phone (formerly Microsoft 365 Business Voice) is a cloud-based VoIP business phone system that integrates with Microsoft Teams. Microsoft Teams Phone makes it possible to enjoy enterprise-quality phone system features without needing to purchase and maintain a physical PBX (Private Branch Exchange.)

Microsoft Teams has become a critical application used by many organizations so transitioning your phone system to Teams may not be much of a leap. Now you can combine calling, chatting and virtual meetings into a single application, using your preferred device.

Microsoft Teams Phone comes fully loaded with phone system features such as auto-attendant, extension dialing, voicemail, call queues, conferencing, and more. The difference is that unlike your average PBX, this VoIP phone service is fully scalable as your workforce grows.

HERE TO HELP.

As a Microsoft partner, Hoop5 has performed countless, seamless migrations to Microsoft 365 cloud services, including Teams setup and training.

Are you planning a move to Microsoft 365 cloud services? We can migrate your phone services at the same time, so all your important communications and data run on the tried-and-true Microsoft platform.

We're here to answer all your questions about Microsoft Teams Phone and will be happy to help you decide whether it's right for your organization.

Teams Phone FEATURES

- Eliminate the costs and limitations of on-premise hardware. Microsoft Teams Phone System can easily scale with your Teams deployment.
- Use your existing local telephone numbers and inbound services. On the Microsoft Teams platform, numbers will work across all devices and locations.
- Use Microsoft Teams to call anyone, anywhere on any device. Calls are delivered via SIP trunks, allowing more effective collaboration than ever before.
